

16, 20, & 24 - TAR ~ Tank Adapter Ring

Septic tanks are available in many types of materials. Plastic and Concrete are the most common. The TAR needs to be assembled with butyl as shown below and pressed firmly to the smooth, flat septic tank surface.

BUTYL

Apply the butyl to the
BOTTOM of the TAR

Firmly press the butyl to the
TAR to form a full ring.

Form a second full ring of butyl. Flip the TAR over and press it firmly to the septic tank surface.
Butyl should be minimum 3/8", butyl ends should be kneaded together
