Wauconda, IL 60084

Re: Provisional Approval of Tuf Tite Risers, Lids and Distribution Boxes

Dear Mr. Meyers:

This letter is in reference to the above mentioned products manufactured and sold by Tuf Tite, Incorporated. In accordance with the Georgia Department of Human Resources (DHR) Rules for On-site Sewage Management Systems, Chapter 290-5-26-.16, the Technical Review Committee (TRC) provisionally approved the use of the following products in on-site sewage systems in Georgia on September 16, 1999:

7 Hole Distribution Box
9 Hole Distribution Box

12 inch Diameter Riser & Lid
20 inch Diameter Riser & Lid
24 inch Diameter Riser & Lid

This provisional approval is subject to review again at such time as the TRC develops final criteria for such products for adoption in the DHR manual for On-site Sewage Management Systems. Any additions or modifications to the approved products must be submitted in writing for approval by this office prior to the use in on-site sewage systems in Georgia.

The Georgia District Environmental Health Directors have been informed of your products provisional approval for marketing and use in Georgia. It is requested that you provide 20 copies of applicable descriptive material for these products which will be delivered to our District Directors. We recommend that you provide, as you deem appropriate, manufacturer's literature related to construction, installation, operation and maintenance of these products to County Environmental Health Departments, septic tank manufacturers and on-site sewage system installers in Georgia.

We appreciate your efforts to develop new on-site sewage system products for potential use in the State of Georgia. If we can be of further assistance to you in this matter, please do not hesitate to call me at (404) 657-6534 or by email to cwjohnson@dhr.state.ga.us.

Sincerely,

Carl W. Johnson
