Re: WQ-IOSWWS-MATERIALS
Distribution Box

Dear Mr. Meyers:

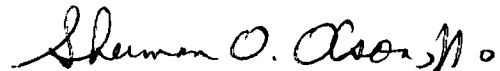

Thank you for sending the nine (9) hole high density polyethylene distribution box for our review. This box uses the same system of seals and plugs as the drop box we accepted for use in this state last September. I am pleased to inform you that this distribution box appears to comply with the Department's minimum standards, as contained in Oregon Administrative Rule 340-73-035. TUF-TITE, INC. is authorized to manufacture and distribute the nine (9) hole distribution box for use in on-site sewage systems in Oregon until further notice, provided the following conditions are met:

1. Each distribution box must be manufactured in compliance with the Department's rules;
2. Factory authorized distributors in Oregon must have an appropriate supply on snap-in seals and plugs in stock and available for use by individuals choosing to use your distribution box;
3. Each distribution box must be marked with your full business name or the assigned number 180.

I would appreciate your sending me a drawing of the nine (9) hole box. Please call if you have questions. My telephone number is (503) 229-6443.

Sincerely,

A handwritten signature in cursive script that reads "Sherman O. Olson, Jr.".
