Re: ANSI/NSF Standard 46 Certification Requirements - Product Literature Review
- NSF Project Number 35289; 41586

Dear Ted:

I have completed review of your revised product literature, data plate and final drawings for the EF-4 Septic Tank Effluent Filter and TB-4 Filter Housing (Tee Baffle). All of these are found to be complete and acceptable.

Based upon the above, along with passing results for testing, and completion of the initial audit, we are able to proceed with ANSI/NSF Standard 46 Certification of the two products. Please be advised, you may not place the NSF Mark on this product or represent it as Certified until you are in receipt of your Official Listing.

If you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Bruursema", with a large, stylized flourish at the end.
