Attention: Ted Meyers, President

Re: Standards for Individual Subsurface Sewage
Disposal System, N.J.A.C. 7:9A
Subsection 8.2(J) 3, pertaining to outlet
connections for Septic Tanks

Dear Mr. Meyers:

I am writing in response to your request for approval
of the Tuf-Tite Gas & Solids Deflector for septic tank
outlet as shown in your catalog.

We find this device meets the requirements of N.J.A.C.
7:9A-8.2(J)3.

Please be advised that as a matter of policy, the
Department of Environmental Protection does not endorse
any particular product or manufacturer. However, based
upon review of the design plan submitted for this product,
this office has concluded that your product meets the
minimum state requirements for septic tank outlet
protection and may be used without certifications by the
National Sanitation Foundation (NSF) of Ann Arbor,
Michigan. This determination is strictly regulatory in
nature and does not prohibit the local administrative
authorities from imposing any additional requirements for
valid reasons.

If you have any questions in regards to this matter,
please contact me at (609) 984-4429.

Sincerely,

Joseph M. Reitzes
Supervising Environmental Engineer
